study places in such valuable human life. However, the authors also make a number of suggestions for making the "Experiment of Consciousness" more effective in the future. They suggest that the program should be made more systematic, that it should be made more available to a wider range of people, and that it should be made more effective in the future. They also suggest that the program should be made more effective in the future.

**PILLS.**  
THE GREAT CURE  
for all diseases of the  
**Liver, Stomach, and Bowels.**  
Put up in Glass Phials, and warranted  
**TO KEEP IN ANY CLIMATE.**

**THESE** Pills are prepared expressly to eradicate from the system all the gross humors and blood-purifiers, *Bridell's Sarsaparilla*, cures arising from depraved humors, and is a pure blood. Under the influence of these *Two Great Remedies*, maldies, that have heretofore constituted incurable, disappear quickly and permanently. In the following diseases these Pills are the quickest, and the best Remedy ever

pared, and should be at once resorted to in all cases of

**DYSPEPSIA, OR INDIGESTION,  
LIVER COMPLAINT,  
CONSTIPATION,  
HEADACHE,  
PILES.**

For many years these Pills have been used in daily practice, always with the most successful results, and it is with the greatest confidence they are recommended to the afflicted. They are composed of the most costly, purest vegetable Extracts and Balsams, and are but seldom equalled in their efficacy, on account of their great cost. The combination of rare medical properties such that in long standing and difficult cases, where other medicines have failed, these extraordinary Pills have effected speedy and thorough cures.

**ONLY 25 CENTS PER PHIAL.**

For sale by all Druggists. J. F. CO., 303 St. Paul street, Montreal.

Agents for Canada, Noid in Belleville, N. J., and in New York, Holden & Co., M. Sawyer & Co., and at Apothecaries' Hall.

## DENTAL NOTICE

MR. RELYEA takes this method of informing his friends that he has covered the lameness of his right leg, and is enabled to resume operations as usual. He is now in the city, and has a new method of filling teeth, by the mallet. The advantages which render of operating possesses over the others are various. The instrument or break, (thus preventing accidents and gums); it is more agreeable to the patient, and is less painful to the patient, and is more durable when completed.

Mr. Relyea, taking advantage of the rate of exchange when last in the city, has returned to his home in

purchased a very large stock of  
 materials for mounting tubes, and is able  
 to insert tubes on the rubber band  
 at a price as low as other specialists.  
 The Leas is determined to be  
 surpassed in the execution of his  
 work for cheapness.

red yesterday at Albany, having no telephones, no prison-ers, and not even a greenback among them. Nearly as many robed about

waterward toward the south, having no other bounds nor British battle-flags, no Canadian silver, no American stamps, nor food, nor time to waste. The only resource is the sea, the only resource in the Fenian insurrection. The sea the great body will not go home until they have done some act worthy of their race, which is possible.—*N. Y. Times, 12th.*

rising host of republicanism, which already chafes angrily against the Canadian boundaries—we think we shall have to take possession of the British provinces. Our destiny, our comfort, our convenience, our necessities all require it. We want the St. Lawrence valley. We want no asylum for our enemies so near our borders.

~~~~~

**THE FEMINE IN CALIFORNIA.**—The San Francisco correspondent of the New York Times, in alluding to the "Great enthusiasm" that prevails among Feemin circles there says:—

England might as well give in and give up the

information and their chief danger. "The telephone industry and enthusiastic meetings were held at Benicia yesterday," said a few of ejaculations—Great excitement! People are getting in immense crowds! Music playing and there playing! Intense interest and enthusiasm! The people in earnest! England little knows her danger. Benicia is the little one-horse town about thirty miles from San Francisco, once known as the rival of San Francisco, containing a population of 10,000, told by raking the surrounding country, celebrated for having in early days come pretty near being something, and a very good place to fish for snappers three or four having been caught there in the last two years. The Pacific Mail Company undertook to take the place of the question, and move the whole world up there by moving the whole world up there, but MAJOR concluded that the machine on the mountain, and Benicia fell still born and

amount of enterprise has ever been able to restrain it. The only great man there was Gen. Bland who to save himself from *chans* started a little gag of poker and cleaned out the principal citizens, still rich and well-to-do, but has never been any more there, but it has now become the *salon* of the officers, and it is a good place for it, for if Florida is to be the death of it, and not put it to sleep, it has changed its character."

~~~~~

NEUTRALITY AND THE PENINSULA.—The House Committee on Foreign Affairs had a special meeting to-day, for the purpose of considering the resolution referred to them respecting the repeal of the present neutrality law; a committee called upon the Attorney General who appeared before them, accompanied

the United States Marshal from New York and the whole question was fully discussed. The Attorney General was of opinion that present law should not be interfered with was essential, in times like the present, should be enforced, else we should find ourselves in a sea of troubles with foreign Governments. The discussion was continued to the hour of adjournment, and consequently no decision was reached. It is safe to predict, however, that the committee will report against any repeal of the law as it stands.

*New York World.*

PARLIAMENTARY.—In the Legislative Co-

oil on Tuesday, the bill to amend the Commissioners' Court Act for Lower Canada was read the second time. Mr. Finat introduced a bill to incorporate the Marmora Railway Company. In the Legislative Assembly a number of bills, chiefly of a private character, were introduced. Among them was one by the Hon. John A. Macdonald, to confer the privileges of a University on Regina College. A debate ensued on Mr. Darnley's proposed election law bill, without advancing it any stage. In reply to a question the Attorney General West said the Government would give the house and country a full measure of consideration the constitution.

WHAT THE FENIANS HAVE ACCOMPLISHED

1. They have drawn the parent country and her North American colonies into greater mutual sympathy and affection.
2. They have banded the British American Provinces more closely together by a sense of common danger, and a desire of mutual co-operation and defence.
3. They have consequently greatly promoted the Confederation scheme.

4. They have elicited a triumphant display of the loyalty and courage of the inhabitants of the two Canadas, who have sprung to arms to defend their country, with promptitude and energy probably never surpassed.

5. They have been the means of bringing out an amount of good faith and efficient effort on the part of the United States authorities to prevent the invasion of a friendly country, which will raise that country in the opinion not only of these colonies but of the world.

And therefore should the Irish in Canada

6. They have placed themselves in a very cruel position—forcing them either to rebel against a government under which they enjoy liberty, equality, peace, and prosperity, or to fight against their own kin.

7. They have rendered themselves a nuisance to the United States as well as to Britain and Canada, and have cast discredit on all aspirations after an Irish nationality.

*Montreal Witness.*

The leading Fenians at St. Albans are Malone, who have been placed under arrest by Gen. Meade, are covering the American frontier with a network of saboteurs.

Government with reproaches for failing to go by implied, if not expressed, hopes of non-interference with their schemes.

**LOCAL CONSTITUTIONS.**—*Le Canada* states that it is understood in Ottawa that the Legislative Council of Lower Canada will not be elective; that the Governor will appoint its members under advice of his ministers; and finally that the project of the local constitutions is ready, and will be submitted to Parliament in a few days, perhaps this very week.

— To restore the color of the teeth,

solve two ounces of borax in three pint water, and before quite cold add thereon a teaspoonful of tincture of myrrh, and a tablespoonful of spirits of camphor. Boil and mix for use. One wine glass of solution, added to a half pint of tepid water, is sufficient for each application. This solution applied daily preserves and beautifies the teeth, extirpates tartarous adhesion, gives a pearl-like whiteness, arrests decay, and produces a healthy action in the gums.

An immense grain-elevator has just been completed in St. Louis. It is on the right bank of the Port of Middle street.

has a frontage of solid stone on the river 126 feet and a depth of 90 feet, and towers seven stories in height. The cost of building was \$350,000, and the land which it is located is worth \$100,000. There are 100 bins in which to store and receive grain, and each bin is 64 feet deep. Twenty-five of these bins will each hold 500 bushels, and the remaining 75 bins will have a capacity to contain 10,000 bushels each.

THE WOOL TRADE.

We are glad to see that the principal wool merchants of New York, Ohio, Michigan and other Western States, have agreed to adopt the following scale of deductions hereafter in their purchases of unwashed and well conditioned wool.

One-half on unwashed Black's Fleeces. One-third on all other unwashed and black fleeces. One-fourth on all other unwashed and black fleeces. One-fifth on all other unwashed and black fleeces. One-sixth on all other unwashed and black fleeces. One-seventh on all other unwashed and black fleeces. One-eighth on all other unwashed and black fleeces. One-ninth on all other unwashed and black fleeces. One-tenth on all other unwashed and black fleeces.

These simple but salutary rules, which we trust will be rigidly adhered to, are much more equitable for the interests of honest dealers. A reform of this kind has long been imperatively needed, and is hailed among eastern wool merchants and manufacturers with great satisfaction, as relieving them from frequent embarrassment and disagreeable alternatives in their dealings.

The Ohio wool growers in connection with Cleveland last week, and adopted a series of resolutions setting forth that the wool crop of the State had largely increased and would probably reach 30,000,000 pounds this year, that the market for wool was in the matter of handling wool and found the reputation of the Ohio clip; recommending a certain mode of washing and packing, and establishing a scale of rates for the government of wool transactions.

It is a pity that the great public remedy has not been in use over twenty years, and it cannot be said that they are on trial. They have been thoroughly tried, and pronounced by the authorities of the wool trade to be the best remedy for the wool trade. They have been tried by the wool trade, and have been found to be the best remedy for the wool trade.

ABOUT WOOL. The farmers of Canada are now busy clipping their sheep, and the wool season will be at its height by the middle of next week. In some localities new wool has already been brought to market, and the shearing is pretty generally over. But the farmers in these districts seem to be hurrying to rush their wool into market. The price offered by dealers up to the present period have not been very high, and there is a very general belief among the farmers that the price will fall upon the arrival of new advances. Whether these hopes will be realized or not, depends very much upon circumstances. At present, the season is not sufficiently forward to speak with much certainty, and more predictions are premature.

Previous experience, however, has been such as would indicate some advance on the opening prices, and we dare say the present year will not prove an exception, although we think no great rise may be looked for. The prospect is, that the wool crop this year will be unusually large. In consequence of the good prices obtained last year, farmers have been inclined to increase the number of their sheep, and the clip of 1866, therefore, promised to be the largest we have ever seen. Had it not been for the American drought, it is quite likely we would have got higher prices from the American market than we have now. As matters are, we have no reason to alter the opinion we expressed in an article some time ago, that the United States demand for our long wools is such that good prices will still be realized by our wool growers. —Trade Review.

New Jewelry Store.

W. J. NORTHGRAVES

RESPECTFULLY

announces to the

inhabitants of Belleville and

vicinity, that he has opened

a Jewelry Store, and

to Mr. Geo. Vail, where

he keeps on hand a splendid assortment

of Watches, Clocks, Fine Jewelry,

Spectacles, Electro Plate,

And almost everything usually kept in

Jewelry Stores.

All kinds of Solid Gold Jewelry, Medals

and Emblems made to order.

Also—Keeps on hand a good assortment

of the latest Music, and orders taken

for any piece in time.

Also—Have on hand some good Melo-

deons and Harmoniums, which I will sell

at reduced prices.
